

Gas : Gas Safety Tips to Users

Purchase, Storage, Replacement and Handling of LPG Cylinders

- *Storage of LPG Cylinders*

The gas users should

- √ store LPG cylinders upright;
- √ store LPG cylinders in a location which is well-ventilated, away from heat and flames and readily accessible.

The gas users should not

- × store LPG cylinders (including empty cylinders) with a total nominal water capacity of over 130 litres (approximately 50 kg);
- × place LPG cylinders near flammable materials or store them together with other flammable materials;
- × use or keep LPG cylinders below ground level , adjacent to drains or in basements;
- × place LPG cylinders in public places.
