

Gas : Gas Safety Tips to Users

Purchase, Storage, Replacement and Handling of LPG Cylinders

- ***Replacement of LPG Cylinders***

The gas users should

- √ ask the cylinder LPG distributor to exchange the LPG cylinders. If the users have to exchange the LPG cylinders themselves, before the exchange, they should check the cylinders, the pressure regulator, the flexible gas tubing and the connection joint for damage, leak or loose connection;
- √ before exchanging LPG cylinders, extinguish all nearby flames and switch off the gas appliances and the pressure regulator;
- √ when exchanging LPG cylinders, carefully and firmly re-connect the pressure regulator, and check that there is no smell or sound of gas leaking from the cylinder connection;
- √ after exchanging LPG cylinders, switch on the pressure regulator and check that the gas appliances for proper operation.

The gas users should not

- × use LPG cylinders of unknown sources;
- × smoke when exchanging LPG cylinders;
- × use naked flame when exchanging LPG cylinders.
